PROJECTS

Screen Time Analysis — Using Python

- Screen Time Analysis lets us know how much time someone spends on what kind of applications and websites using your device.
- Creating visually appealing reports and charts to present the Screen Time Analysis results.
- Providing insights and suggestions on how users can manage their screen time more efficiently.

Airline Data Analyst — Using Python and SQL

- In this Project, enhance the overall performance and profitability of the airline.
- Worked on Python libraries like pandas, matplotlib, seaborn.
- Through data analysis and visualization with these libraries we will gain insights on various flights.

LinkedIn Profile Dashboard — Using Power BI

- The dashboard will present a breakdown of post engagement metrics, including likes, comments, and shares.
- Data integration and extraction are performed, ensuring data accuracy.
- By tracking profile views and analyzing endorsements and recommendations, users can refine their personal branding and make improvements to positively impact their career growth.

UBER Drive — Using Excel

- The objective is to analyze and gain insights from the dataset, shedding light on various aspects of the UBER driving experience.
- Data cleaning is performed, free from any errors or inconsistencies.
- Filtering and Sorting to arrange data in a more meaningful way.

EDUCATION

Institute of Technology Gopeshwar — B.Tech

August 2019 - June 2023

Branch - Computer Science and Engineering

R.P.Public School, Kotdwara — 12th

Pass Out - 2019 BOARD - CBSE Stream - PCM

R.P.Public School, Kotdwara — 10th

Pass Out - 2017 BOARD - CBSE

TECHNICAL SKILLS

Languages:

Python, PostgreSQL

Software Used:

MS Excel, MS word, MS
Power-point, Power BI

SOFT SKILL

Writes clearly and concisely,
speaks effectively, listened
attentively, supportive,
cooperative, accepts
responsibility, punctual,
Good analytical skill,
Problem solving

LANGUAGES

English, Hindi
