## PROJECT

Transport Buddy (2022)

- **Platform:-**React JS, Springboot, MySQL
- Built a responsive app using React and Spring that allowed users to book their choice of vehicle to transport goods from one place to another on their return trip(vacant). With the help of Transport Buddy, users can save up to 25% of fares on their bookings as our application utilizes the vehicles of the transporters on their return trip(vacant in maximum scenarios). Used Java, MySQL, and HTML/CSS in the creation and maintenance of the application implementing receipt generation.
