PROJECTS

- **Quiz App**

I developed this project by using HTML, CSS and JavaScript. The feature of the project were:-

1. Select option from multiple choices.
2. Get the result of the question as correct or incorrect.

- **Responsive Blog Website**

I developed this project using HTML, CSS and JavaScript. Technologies used in this project were HTML, CSS and JavaScript. Features of the project were:-

1. Dynamic Blog pages.
2. Have a dedicated editor for blogs.
3. Users can add/make as many blogs you want.
4. Users can add Headings, paragraphs, and Images to the blog post.

- **Personal Portfolio**

I developed this project using HTML, CSS, JavaScript and Bootstrap Version 5.

1. It has six links: home, about, services, portfolio, contact, and footer
2. It has a transparent background.

- **Meditation app using HTML, CSS and JavaScript**

- Talking about the features of this system, the user can meditate and relax by enjoying the peaceful sound of a cloudy day or a sunny day as their choice.
- Also, you can adjust the meditation time period from the options provided in the app.
- You just have to select the meditation environment for a sunny or cloudy day and set the time period through options, then enjoy the sound
