PROFESSIONAL SUMMARY

Results-driven Computer Science Engineer with 1.7 years of hands-on experience in requirement gathering, technical documentation, project management, and business analysis. Proven ability to independently execute projects, coupled with a strong academic background. Seeking a growth-oriented role where I can contribute my skills and learn from experienced team members in a collaborative environment.

Professional Experience

12th Wonder | Business Analyst

Apr, 2023 - Oct, 2023

Key responsibilities:

- Worked closely with the engineering, product, data science and other operational stakeholders to build and improve automated workflows
- Created BRDs, flowcharts and documentation on business requirements and implemented them through effective time and stakeholder management
- Undertaken compensation benchmarking that has helped ensure competitive compensation packages
- Designed a pricing model for our organization, establishing a structured strategy to determine product and service prices, ensuring profitability and competitiveness in the market.
- Conducted financial modelling to analyze data and generate projections for informed financial decision-making and optimization

Sudofire | Business Analyst

Nov, 2022 - Apr, 2023

Key responsibilities:

- Hands-on experience in task and project management.
- Defined business requirements and reported them back to stakeholders
- Constructed project documents (BRD) as per the project requirement and developed Flow charts, Used case diagrams, ER diagrams, and User stories
- Supported the team in analysing business requirements and technical specifications to see how they could be developed into small testable and releasable elements
- Understand the client requirements and provide solutions on time. Preparation of dealer performance reports

EduBenchers | Data Analyst Intern

Jul, 2021 - Sep, 2021

Key responsibilities:

- Interpreted data and analysed results using statistical techniques and provide ongoing reports
- Identified, analyzed, and interpreted trends or patterns in complex data sets from the collected data
- Implemented databases, data collection systems, data extraction, data analytics, and other strategies that optimize statistical efficiency and quality

Dr. SJ Research Foundation (NGO) | Data Analyst Intern

Jun, 2020 - Aug, 2020

Key responsibilities:

- Contributed to the phase of the data mining and project management
- Provided well-designed and efficient dashboards

Education Background

- | | |
|---|-------------------|
| ● Savitribai Phule Pune University Pune | Completed in 2022 |
| Bachelor of Engineering -Computer Science | |
| Graduated with an Engineering degree in Computer science with an SGPA OF 7.67 | |
| ● Life career school Amla | Completed in 2018 |
| Senior Secondary - Acquired percentage in 12th class - 74.62 | |
| ● Satpuda valley public school Betul | Completed in 2015 |
| Higher Secondary -Acquired CGPA in 10th class - 7.0 | |

Technical Skill

PROGRAMING LANGUAGES - PYTHON, R

DATA BASE - Sql, Mysql

Miscellaneous - Ms Excel, MS Word, MS Office, Vba,
Dashboards, Reports, Analytics, Statistics

AI/ML- Pandas, Numpy, Scikit Learn, Matplotlib

VISUALIZATION - Tableau, Power BI

Technical Skills - Financial Modelling, Compensation
benchmarking, Business Process Analysis, Requirement
Document Analysis , Prompt Engineering

Certificates

- R programing certificate
- Visualization with Tableau certificate
- Python specialization certificate
- MS-excel specialization certificate
- Google Data Analytics professional certificate

Projects

- Financial Statistics Dashboard (using MS-EXCEL)
- Credit Card Fraud Detection(using machine learning)
- SALES INSIGHT ANALYSIS (Using TABLEAU)
- Covid Analysis (Using SQL, PYTHON AND TABLEAU)
