Profile

Innovative software developer with a proven record of delivering high-impact solutions. Expertise in full-stack development, employing cutting-edge technologies to drive efficiency and enhance user experiences. Skilled in problem-solving and collaborating with cross-functional teams to achieve project objectives. Committed to continuous learning, staying ahead of industry trends, and pushing boundaries of software development.

Professional Experience

Expert Global Solutions An Alten Company, (Full Stack developer)

09/2022 – 07/2023

Aurangabad, India

Worked as a full-stack developer supporting a project utilizing Node.js, Angular, and RESTful API development. Collaborated on building scalable and responsive applications with a focus on user experience. Leveraged Node.js for server-side development and utilized Angular to create dynamic front-end interfaces. Developed and maintained RESTful APIs to facilitate seamless client-server communication. Contributed to high-quality code delivery and effective cross-functional teamwork.

Dualsysco Research and Development, (Web Designer Intern)

12/2021 – 05/2022

As a Web Designer Intern, I actively collaborated with the design team to create visually appealing and responsive websites. I utilized HTML, CSS, and JavaScript to implement design elements and interactive features, ensuring seamless user experiences. Additionally, I conducted quality assurance testing and remained dedicated to continuous learning, staying updated on industry trends. My problem-solving skills and adaptability were put to the test as I successfully addressed challenges. I am eager to leverage this hands-on experience and contribute to your organization's web design initiatives.

PostMan
ThunderClient

Certificates

- Front End Web Development, Angular, Bootstrap. (Udemy)
- Node.js, Express, MongoDB, (Udemy)
- Introduction To HTML 5 (Coursera)
- Ai For Everyone (Coursera)
- Python Data Structures (Coursera)

Projects

Online Complaint Redressal System, Technology (MEAN Stack)

Description: online Complaint Redressal System is an online platform available to the customers 24x7 to lodge their grievances to the admin on any subject related to service delivery. It is a single portal connected to all the Customers, Manager, Engineer, And Workers on field. customer can track the status of tickets, Manager can assign Engineers on the customer tickets.

Responsibility:

Frontend:- worked on developing Admin-module where admin can Track All the Ongoing process and create new users like Manager, customer and Engineers.

Backend:- : (a) Schema designing for Mongo-Db.

(b) CRUD operation for performing Services in node.js

(c) API creation Using Express

E-commerce website using Angular.js and Json server

Description:- on the admin side:- I have implemented functionalities for adding, editing, and deleting products. This allows the admin to manage the product inventory efficiently.

on the user side:- I have implemented features that enable users to view products with price and description and add them to the shopping cart. This enhances the user experience by providing a seamless shopping process.

Overall, the project demonstrates my ability to develop a functional and user-friendly e-commerce website using Angular and JSON Server

Job Portal, www.jobsdaily.online

Jobsdaily project is Portal where freshers graduate and job seekers can find regular updates regarding jobs. where they can know about job details , Salary, Job Role. as well as they Apply from the Portal This project Was Developed by Myself as Side hobby.

Technology :- HTML ,CSS, WORDPRESS
