SUMMARY

Motivated and detail-oriented Full Stack Web Developer with a strong foundation in HTML, CSS and JavaScript. Passionate about creating responsive and visually appealing websites with a focus on user experience. Seeking a position as a Full Stack Web Developer and Software Developer to contribute to the development of cutting-edge web solutions and grow as a professional in a collaborative and dynamic environment.

INTERNSHIP

Full Stack Web Developer

Werbooz

February 2023 - June 2023, Indore

- Developed and implemented responsive web applications using HTML, CSS, and JavaScript
- Resulting in improved user experience and increased client satisfaction. Collaborated with cross-functional teams to design and integrate RESTful APIs, enabling seamless communication between front-end and back-end systems. Led the creation and maintenance of databases, ensuring efficient data storage and retrieval
- For dynamic web applications. • Conducted regular code reviews and debugging sessions, identifying and resolving software defects to ensure optimal performance and functionality of web applications.

Full Stack Web Developer

NullClass

January 2023 - February 2023, Bengaluru, Karnataka

- As a front-end web developer at NullClass, I focused on crafting visually appealing and user-friendly interfaces.
- Leveraging my expertise in HTML, CSS, and JavaScript, I played a pivotal role in designing and implementing responsive web layouts.
- Collaborating closely with the design team, I translated mockups into interactive, feature-rich web pages, ensuring a seamless user experience.
- My commitment to staying abreast of the latest web technologies contributed to creating dynamic and modern websites that met both aesthetic and functional requirements.

PROJECTS

Stone Paper Scissor Game

July 2022 - August 2022

- Developed and implemented a Stone-Paper-Scissors game, showcasing programming skills in creating interactive and engaging user experiences.
- Utilized languages such as Python and integrated logic for seamless gameplay. Demonstrated problem-solving abilities by addressing various game scenarios and ensuring a smooth user interface.

Hospital Management System

November 2021 - December 2021

- Technology Used: HTML, CSS and JavaScript, Java, MySQL
 - Led the 2 members of team in designing the front-end using HTML, CSS and JavaScript.
 - Implemented the back-end logic in Java, handling user authentication, data processing and system functionality.
 - Created and maintained the MySQL database, managing patient data, appointment and staff records.
 - Ensured the project successful completion, testing and deployment meeting all requirements as it was a college project.
 - This project aims to enhance patient care, optimize resource utilization, improve data accuracy, and ensure regulatory compliance.
-
