PROJECTS

Todo Application

Jan 2022 - Feb 2022

<https://applicationtd.ccbp.tech/>

Generally, in this application we can create the task and after completion of the tasks we can remove them as well. I have also used client-side data storage mechanisms to persist the data even on reloading technologies are HTML, CSS, Bootstrap, JS

Counter Application

Dec 2021 - Jan 2022

<https://capplication1.ccbp.tech/>

I have included three buttons Increase, decrease, reset and I have also maintained the colors for each button green for increase, black for reset, red for decrease. I have developed this application using HTML, CSS, Bootstrap, JS.

Cat on-off Webpage

Oct 2021 - Nov 2021

<https://jsonof1.ccbp.tech/>

It is the simple dynamic page. I have used HTML DOM so that I can manipulate HTML, CSS using JavaScript. I have developed this using HTML, CSS, Bootstrap, JS. I have made the switches to listen the user actions and work accordingly.

Food Munch Webpage

Sep 2021 - Oct 2021

<https://fmunch1.ccbp.tech/>

It is a single page with different sections. I have developed this using HTML, CSS, Bootstrap, Responsive Web Design. I have also used Bootstrap utilities such as Modal, Order class names, Display utilities, Shadow utility, Sizing utility.

Tourism Website

Jul 2021 - Aug 2021

<https://twebsite2.ccbp.tech/>

Tourism Website is a combination of different tourist places which gives glance about the places. I have developed this using HTML, CSS, Bootstrap.
