PERSONAL PROJECTS

Vrinda Store Annual Report 2022

- "I successfully compiled an annual report for Vrinda Store using Microsoft Excel, employing various data management techniques, including data cleansing and data analytics.
- I harnessed the power of Excel's features, particularly pivot tables, to effectively analyze the provided data. Moreover, I created a dynamic and interactive dashboard that provides a comprehensive overview of the store's performance.

Digital Music Store Analysis

- In this project, I work with a dataset containing information about a digital music store's sales, customers, and tracks. The objective is to perform various SQL queries and generate reports to extract valuable insights that can aid in making data-driven decisions for the music store.
