PROJECTS

Home Services App Project (Java and Android)

Jul 2023 – Dec 2023

- Directed the creation of a comprehensive home services app for Android, utilizing Java programming, resulting in a remarkable 30% increase in customer retention and 20% boost in monthly revenue
- Enhanced user experience by streamlining the service selection and booking process through collaborative UI/UX design, leading to 50% reduction in customer support inquiries
- Led the integration of real-time service tracking functionality by leveraging the Google Maps API, resulting in a notable 20% reduction in response time
- Guided cutting-edge location-based technology to empower team with precise location data, enabling faster decision-making and seamless service delivery

Web-Based House Rental Project

Jul 2022 – Jan 2023

- Designed & developed a state-of-the-art house rental website, harnessing the power of HTML, CSS, and PHP to engineer a user-friendly platform
- Engineered and implemented robust user authentication, property listing, and search functionalities on the house rental website, enhancing the user experience and facilitating seamless property exploration
- Architected a MySQL database to manage property information and user profiles, ensuring data integrity and seamless access to critical information
- Optimized database query times by 40% and streamlined data retrieval, leading to improved website performance
