PROFESSIONAL SUMMARY

To obtain a responsible, challenging, and awarded position in an organization with an established track record where my skills and technical abilities can use. It will help me to succeed in an environment of growth and excellence and earn a job that provides job satisfaction and self-development to help me achieve personal and organizational goals.

PROFESSIONAL EXPERIENCE

July 2022 - July 2022
Technical Documentation Website Using HTML & CSS, *Tapadipto Banerjee*
Introduction – Technical documentation is any document that explains the features of the respective product. In this project, we are going to create technical documentation of C++, Java, and also HTML using HTML and CSS. The webpage has menu sections that help to navigate to different sections of the webpage.
Approach – We are going to divide the whole webpage into two sections. The left side has a menu called Documentation Menu with all the topics listed inside a navigation bar. It contains anchor tags that have links to IDs of all the sections(like inheritance, polymorphism, and other oops concepts in C++ and Java). In HTML we give document Structure, elements, attributes, Text Formatting, Images and Linking, Tables, etc. On the right side, we have descriptions for each of the topics. The idea behind this is once the user clicks on one of the topics in the left section, respective topic details will load the content on the right. In the CSS file, we are just beautifying the texts like their alignment, padding margin, etc.

September 2022 - September 2022
Portfolio Website, *Tapadipto Banerjee*, Kolkata, India

- **Personal Portfolio Websites**
Objective(s)

- This project specifies that it presents my work that represents my performance and skills as well as strengths and weaknesses. The culmination of work that is represented in a portfolio allows peers, mentors and potential employers to get and understanding of me as a student, my passions and my work.
Overview
This Personal Portfolio Website project is based on Web Development. This is developed using HTML5, CSS and JS. I use VS Code (Code Editor) for this project.
It displays the professional background of an individual. It displays brief information about education, skills, Internship, Projects and contact details along with social media links. All the elements are rendered distinctively on the website.
Personal Portfolio Websites brief information about the professional background of an individual.

June 2020 - November 2020
Student Brand Ambassador
