PROJECTS

PROJECT 1

TITLE: FACE RECOGNITION" DESCRIPTION

Domain : Machine Learning The main objective of this project is recognition of Face . It compares the face in front camera with that of captured earlier. It also shows the confidence level of user despite of variations, lighting and expressions. It compares various features like height, width of the face, nose, lips etc., and average color of the face(R,G,B) and so on. So that it can map out the above features in the image

PROJECT 2

TITLE: Brain Tumor Detection Using Convolutional Neural Network

Domain: Machine Learning, HTML, CSS The challenging task of brain tumor segmentation in 2D MagneticResonance Brain

Images (MRI), recognizing the limitations of manual classification and the complexities arising from diverse tumor appearances.

The proposed methodology clustering algorithm for initial segmentation, followed by a comprehensive analysis employing

traditional classifiers and a Convolutional Neural Network (CNN).

CERTIFICATIONS

- Certificate in AI & ML virtual intership from eduskills.
- Certificate in AWS.
- Recevied CYBER SECURITY certificate from edu skills.
- Certificate in SOFT SKILLS certification from NPTEL .

Declaration

I here declare that the above information is true and correct to the best of my knowledge
