JOURNAL

Metaverse, Augmented Reality, Cognitive Artificial Intelligence and Machine Vision Algorithms based livestreaming shopping platforms is the proposed invention.

PROJECT

Organ and Blood Sharing – Donor Finding using Python

This proposed system is to collecting the donations and delivering them to then respective organizations and also provides the information to the volunteers of that organization to maintain transparency. Moreover, the system could be designed in such a way to exchange information with other tools and take into account their results, producing a result which is already suitable under the three points of view.
